## Professional Summary

Node.js Developer with 5+ years of experience in building scalable backend applications and RESTful APIs using **Node.js and Express.js**. Skilled in designing efficient server-side logic, integrating databases such as **MySQL and MS SQL**, and developing secure and high-performance web applications. Experienced in Agile development environments and collaborating with cross-functional teams to deliver robust software solutions.

---

## Technical Skills

- **Backend Technologies**  
Node.js, Express.js, REST API Development, Middleware Development, JWT Authentication, API Security, API Integration, MVC Architecture, Asynchronous Programming (Async/Await, Promises), Error Handling & Logging
  - **Frameworks & Libraries**  
Express.js, Nest.js, Angular, Bootstrap, Mongoose, Socket.io
  - **Databases**  
MySQL, MS SQL Server, MongoDB, Database Design, Query Optimization
  - **API & Backend Concepts**  
RESTful API Design, Authentication & Authorization, Role-Based Access Control (RBAC), API Validation, JSON & Data Handling, Microservices Architecture, Webhooks
  - **Web Technologies**  
HTML5, CSS3, JavaScript, AJAX, DOM Manipulation
  - **Tools & Development Environment**  
Git, GitHub, Visual Studio Code, Postman, MySQL Workbench, npm, API Debugging Tools
  - **DevOps & Deployment**  
Node Package Manager (npm), Environment Configuration (.env), Basic Docker Knowledge, Application Deployment
  - **Methodologies**  
Agile, Scrum, Code Review, Version Control
- 

## Professional Experience

**STEPSTRONG SOFTWARE PVT LTD Pune – Software Engineer | Oct 2024 – Present**

**Sapours Technology Pvt. Ltd., Pune – Trainee Developer | April 2019 – July 2021**

**RSL Pvt. Ltd., Pune – Software Engineer | Mar 2017 – Sep 2018**

---

### Project: Medicine Inventory Management System

#### Project Overview:

Developed a web-based platform that allows users to send parcels through travelers. Travelers can publish their trip details and accept parcel requests from users, enabling cost-effective and efficient parcel delivery through shared travel.

### Key Responsibilities:

- Developed backend services and RESTful APIs using **Node.js and Express.js**.
  - Implemented server-side business logic for parcel booking and travel management.
  - Designed and managed **MySQL database** for storing user, trip, and parcel information.
  - Built reusable and scalable components for efficient application performance.
  - Integrated backend APIs with the **Angular frontend** for dashboard and user interactions.
  - Implemented features for users and travelers to **manage trips, parcels, and dashboards**.
  - Participated in debugging, performance improvement, and application maintenance.
- 

### Project: Harmony Manager Portal

#### Project Overview:

Developed a web-based portal designed for managers and higher authorities to monitor employee activities, project assignments, performance, and leave management. The system helps managers efficiently track employee information and manage approvals.

#### Technologies:

Node.js, Express.js, Angular, MySQL, JavaScript, HTML, CSS

#### Key Responsibilities:

- Developed backend APIs using **Node.js and Express.js** for employee and project management.
  - Designed and managed **MySQL database** for storing employee records, project data, and leave details.
  - Implemented modules for **employee information tracking, project assignments**.
  - Integrated backend APIs with **Angular frontend** to provide interactive dashboards.
  - Participated in **client requirement discussions and system architecture planning**.
  - Ensured application performance and maintained code quality through code reviews.
- 

### Project: Scalable Multi-Tenant SaaS CRM Platform

#### Project Overview:

Designed and developed a scalable multi-tenant CRM (Customer Relationship Management) platform that enables multiple organizations to manage customers, sales pipelines, leads, and team performance within a single system. The platform supports secure tenant isolation, real-time updates, and high-performance data handling.

#### Technologies:

Node.js, Express.js, MongoDB, React.js, Mongoose, REST API, JavaScript, HTML, CSS, Bootstrap, JWT Authentication, Redis (Caching), Socket.io, Docker (Basic), Microservices Architecture

#### Key Responsibilities:

- Developed scalable backend services using Node.js, Express.js, and microservices architecture.
  - Designed multi-tenant MongoDB architecture with secure data isolation.
  - Built React.js dashboards with reusable components for CRM analytics.
  - Implemented JWT authentication, RBAC, and API security best practices.
  - Optimized performance using Redis caching, efficient queries, and indexing.
  - Developed REST APIs with validation, logging, error handling, and integrated third-party services.
- 

## Education

**Bachelor of Computer Engineering from Savitribai Phule Pune University 2014**

---
